2 AWD / 4 AWD 2 SEATS (HOMOLOGATED) - 2 AWD / 4 AWD 4 SEATS (NON HOMOLOGATED)

SHERPA 4WD is the ideal vehicle for moving around efficiently. Quiet and eco-friendly, it carries people and materials wherever they're needed. On golf courses, it moves between the greens without disturbing the game. In holiday resorts, it becomes the perfect partner for guest transfers and assistance services. Inside natural parks, reserves, and safari areas, it allows visitors to explore nature while enhancing the experience and helping protect wildlife. On farms, it supports field work—from transporting tools to carrying small loads—with great agility even on rough ground. SHERPA 4WD is more than just a vehicle: it's a green mobility solution designed for those who want to combine practicality, brand image, and respect for the environment in one single vehicle.
